Allergy Research Today

Paris, February 15, 2018

Dear Colleague,

This is to inform you that, this year again, a meeting devoted to Research in Allergy will be held in Paris, which, we believe, may interest members of your society.

This one-day meeting entitled "**Allergy Research Today (ART 2018)**" is organized by the *Société Française d'Allergologie* with the support of the *Société Française d'Immunologie*. It brings together young and confirmed European scientists who are wishing to share most recent and exciting research on and around Allergy in an informal and friendly atmosphere. It will be held **April 17, 2018**.

This year, we will have the privilege to welcome **Thomas Bieber**, from the University of Bonn, and **Caetano Reis e Sousa**, from the Crick Institute in London, who will give the opening and the closing lectures, respectively. Four young scientists will discuss exciting results that they published recently in the "What's up?" session, and **Hamida Hammad** from Gent University, who was given carte blanche to invite four scientists of her choice, built up an outstanding Guest Organizer session. A short talk session will also give the opportunity to five very young scientists to present their work.

Online registration is now open on the *Congrès Francophone d'Allergologie* website: <https://register.congres-allergologie.com/Registration-6464>

We would be very grateful if you were kind enough to disseminate the information on the website and/or newsletter of your society.

Thanking you in advance for your help, we look forward to welcoming you and members of your society this Spring in Paris.

With our best regards,

Marc Daëron, Anne Tsicopoulos, Valérie Verhasselt and Hamida Hammad,

ART 2018 Scientific Committee

Jean-Luc Fauquert,

Président of the SFA Scientific Council
